An aircraft is a machine that is able to fly by gaining support from the air. It counters the force of gravity by using either static lift or by using the dynamic lift of an airfoil, or in a few cases the downward thrust from jet engines. Common examples of aircraft include airplanes, helicopters, airships (including blimps), gliders, and hot air balloons. ...

Master of Science in Civil Engineering: Energy Infrastructure . Learn about this online master's program, which prepares graduates for cutting-edge careers in the energy industry.

### **Engineering - UW Professional & Continuing Education**

Aerospace engineering is the primary field of engineering concerned with the development of aircraft and spacecraft. It has two major and overlapping branches: Aeronautical engineering and Astronautical Engineering. Avionics engineering is similar, but deals with the electronics side of aerospace engineering.. Aeronautical engineering was the original term for the field.
