Impulse  $J$  produced from time  $t_1$  to  $t_2$  is defined to be  $= \int_{t_1}^{t_2} F dt$  where  $F$  is the resultant force applied from  $t_1$  to  $t_2$ . From Newton's second law, force is related to momentum  $p$  by  $F = dp/dt$ . Therefore,  $\int_{t_1}^{t_2} F dt = \int_{t_1}^{t_2} dp = \Delta p = p_2 - p_1$  where  $\Delta p$  is the change in linear momentum from time  $t_1$  to  $t_2$ . This is often called the impulse-momentum theorem. As a result, an impulse may also be regarded as the change in ...

In fluid dynamics, drag (sometimes called air resistance, a type of friction, or fluid resistance, another type of friction or fluid friction) is a force acting opposite to the relative motion of any object moving with respect to a surrounding fluid. This can exist between two fluid layers (or surfaces) or a fluid and a solid surface. Unlike other resistive forces, such as dry friction, which ...

Ein Einheitsvektor ist in der analytischen Geometrie ein Vektor der Länge Eins. In der linearen Algebra und der Funktionalanalysis wird der Begriff der Länge auf allgemeine Vektorräume zum Begriff der Norm verallgemeinert. Ein Vektor in einem normierten Vektorraum, das heißt einem Vektorraum, auf dem eine Norm definiert ist, heißt Einheitsvektor oder normierter Vektor, wenn seine Norm ...

En un movimiento de rotación periódico, no oscilatorio, el período de rotación hace referencia al tiempo que debe transcurrir entre dos pasos sucesivos del cuerpo que realiza el movimiento por la misma posición.. En el caso de que un cuerpo presente un movimiento de rotación con velocidad angular constante alrededor de un eje fijo, su periodo de rotación será:

Innledning. En masse  $m$  er påvirket av tyngdekraften  $F = -mg$  hvor  $g = 9.81 \text{ m/s}^2$  er tyngdeakselerasjonen ved jordoverflaten. Minustegnet viser at den virker nedover. Massen ligger i en høyde  $z > 0$ . Det gjelder, res ved å utsette den for en motsatt kraft  $F' = mg$  som beveger den oppover. Når kan dette gjøres svært langsomt da totalkraften som virker på massen  $F + F' = 0$ .
